

# TRAINING MATERIALS

## for Children's Advocacy Centers

Culture Reframed has [partnered with CACs nationwide to develop resources](#) that support multi-disciplinary practitioners and help child victims of abuse, with a focus on resources to help address the increasing incidence of child-on-child sexual abuse, specifically as it relates to pornography exposure.

These resources include video interviews, screening tools, conversation scripts, and informational fact sheets. All are designed to support advocates and health professionals at CACs — from nurses to police officers to concerned parents — so they can better serve the families and victims of abuse.

### What do the resources contain?

- Expertise from CAC professionals serving young victims of abuse
- Knowledge from science-based researchers at Culture Reframed
- Talking points, conversation scripts, and screening questions for youth of all ages
- Access to additional resources, video interviews, and digital courses

[Sign up](#) to access the full [FREE library of resources](#) developed in partnership with CACs

### Critical to Know

- More than 600,000 cases of child abuse are reported in the U.S. each year
- CACs educate more than 1.5 million people annually
- Nearly two-thirds of cases handled by CACs involve child sexual abuse
- Exposure and consumption of pornography are common reports of victims interviewed at CACs
- The average age kids are exposed to violent pornography is 12
- Viewing porn can lead to sexual misconduct, abuse of children, grooming, and sextortion
